Phase II Sidewalk Reconstruction begins in Fairmount Area

The City will soon begin the second phase of reconstruction of sidewalks in the Fairmount area. The project includes replacement of sidewalks on the west side of Georgia Avenue between Maple Street and East Cedar Street and on the west side of Kentucky Avenue between Pine Street and Chestnut Street and on the west side of Kentucky Avenue between Pine Street and Chestnut Street. The project is anticipated to conclude this spring.

The city has contracted with local construction and engineering firms to perform construction and to provide field project management. The City, the engineering firm, and the contractor will make every effort to minimize inconveniences during the construction period and will restore all disturbed areas to their original condition. In the interest of safety, please avoid entering the construction area, be alert for moving heavy equipment, and discourage children from playing in these areas.

Traffic disruptions, including temporary road closures, may be required during the project. However, accommodations will always be made to allow residents access to their property within the construction zone.

Please contact Tim Beavers, Director of Public Works at 989-5556 or email at tbeavers@bristoltn.org should you have any questions or concerns.

The City of Bristol appreciates your patience and understanding during this period and, as always, hopes to provide you the best in municipal services.
