Imminent Lane Closures Announced for 5th Street and E. Cedar Street

Please be advised by the City of Bristol, Tennessee, that lane closures will occur at the intersection of 5th Street and E. Cedar Street and along E. Cedar Street from 5th Street to King College Road.

On November 24, 2014 and November 25, 2014, weather permitting, a contractor will temporarily close portions of 5th Street and E. Cedar Street to perform geotechnical work. Traffic disruptions, including the temporary lane closures during daylight hours, will be required. Accommodations will always be made to allow residents access to their property within the work zone.

The contractor will make every effort to minimize inconveniences during the work period and will restore all disturbed areas to their original condition. In the interest of safety, please avoid entering the work zone, be alert for moving heavy equipment, and discourage children from playing in these areas.

Questions concerning this project may be directed to City Engineer Jacob Chandler at (423) 989-5585.
