

Water Quality BMP Manual

Errata Sheet

for the documents entitled:

Northeast Tennessee Water Quality BMP Manual, February 2008

City of Bristol Water Quality BMP Manual, March 2008

Page	Erratum	Date
4-26	Part C. Physical Specifications/Geometry. Delete the last bullet for the sizing of the permanent pond volume sizing bullet for Micropool ED basins. Replace with "Micropool ED basins: Approximately 0.1 inch per impervious acre (363 ft ²).	3.24.08
4-28	Second bullet. Add "except in the case of Micropool ED basins." to the end of the last sentence. Also add "The pretreatment volume may not be subtracted from the permanent pool volume for Micropool ED basins."	3.24.08
4-139	Step 7. Delete current statement. Add: Dry Swale: Design low flow orifice to pass WQv in no less than 24 hours, but no greater than 48 hours. Wet Swale: No drawdown orifice is required for wet swales. In areas where the swale is above the water table and prolonged periods of standing water are not desirable, use the procedure in this manual to design a dry swale.	6.16.08
